Policy No.: S-00-01

Date: Revised December, 14, 2015
Revised September 28, 2020

Policy Statement:

A policy for the Town of Bow Island for the placement of snow fence, snow removal and sanding of streets as required during the winter season.

Procedures:

The Public Works Department will place snow fence in areas determined to contribute to the problem of drifting within the Town of Bow Island. When there has been a considerable amount of snowfall the Town of Bow Island will be committed to providing safe and open traffic throughout the Municipality. When ice accumulates on the roadways the Public Works Department will perform due diligence by placing sand at intersections where it is considered to be a safety concern for residents of the Municipality.

The Town of Bow Island Public Works Department will determine prior to October 1 of each year the areas which required the placement of snow fence for the coming winter season. Snow fence will be placed in areas known to have excessive drifting due to wind direction which may cause problems for the residents of the Municipality by October 31.

Due to excessive snowfall the roadways listed may be cleared in a different order.
