Jubilee Park: 210 4 Ave E

About Bow Island

Bow Island is a quiet town in the middle of a very diverse agricultural area. The town is surrounded by irrigated farming which encompasses a variety of different crops such as beans, potatoes, sugar beets, dill, spearmint, and a very progressive dry lane farming economy.

Over 100 years ago, people looking for new opportunities settled in this area and began farming and ranching. In 1910 the Village of Bow Island was formed and two years later Incorporated as a Town. The Introduction of irrigation in the '50's brought more opportunity and more people to the sunniest area in Canada.

Bow Island has prospered as a result and remains an agricultural community at heart, but has seen more commercial diversity in recent years.

We are blessed with good local health and senior care. There are a variety of recreation opportunities and good schooling in Bow Island. Our well established business sector provides access to essentials and other services .

A Message From the Mayor of Bow Island

Welcome to a great community!
 Bow Island is a friendly, vibrant, diverse and entrepreneurial community. In our small town atmosphere and pace help make this great place to raise a family and includes many of the necessities of a great lifestyle. We enjoy affordable housing, quality healthcare and education opportunities, safe neighbourhoods and variety of recreational activities.
 Our diversity is reflected not only in our friendly citizens but in our business sector as well. The entrepreneurial flame was lit here in 1908 with the first mayor discovery of natural gas in Alberta and has continued to this day in agriculture, construction and manufacturing. The progressive farmers and businessmen of Bow Island provide a range of employment opportunities for our growing population.
 If you come here for a visit, or are thinking of settling down here, you will find yourself welcome and have an opportunity to be part of a great community.

Mayor Gordon Reynolds
